# Datasheet Cleaning concentrate for ultrasonic baths – acidic (descaler)

Cleaning concentrate with excellent dissolving power for limescale and other mineral deposits. Also suitable for removing animal and vegetable fats and oils. Does not produce corrosive vapours.

### Properties and use

- For limescale and mineral deposits
- Pack sizes: 250mL and 1000mL; 10L on request
- Not for highly acid-sensitive parts
- Follow the datasheet and label

**Notes:** Do not use for highly acid-sensitive parts. For such parts, we recommend conventional liquid soap or our neutral special-purpose cleaner.

250mL and 1000mL bottles.

## Product data

| Property | Specification |
|---|---|
| **Product codes** | 2803 (250mL) / 2804 (1000mL) |
| **Product type** | Acidic descaler |
| **pH of concentrate** | 1.5 |
| **pH at 1%** | 2.5 |
| **Ingredient groups** | Phosphoric acid, non-ionic surfactants, fragrances, water |
| **Shelf life** | 2 years |
| **Material restriction** | Do not use on limestone or engineered stone |
| **Dosage** | 10–100mL per 1L of water (1–10%) |
| **Hazard statement** | H319: Causes serious eye irritation. |

**Application:** Add 100–1'000mL to 10L of water. Heating the ultrasonic bath improves cleaning performance. Percentages refer to the volume of water. Adjust the temperature to the material and soiling; follow the datasheet and label.

**Safety:** In case of skin or eye contact with the cleaner, rinse thoroughly with water. Avoid prolonged skin contact with diluted solutions. If swallowed, seek medical attention immediately. Safety goggles and gloves are recommended. Keep out of reach of children.
